

B Venkatraman - Technical Consultant

Profile

Venkatraman is a technologist with over **twelve years** of experience in the information technology industry. With a passion for excellence in the delivery of solutions using technology expertise, he embraces state-of-the-art techniques in delivering value that translates in costs savings to client's business needs. His prowess includes Product Management, Business Process, Systems Integration and Technology implementations in Telecommunication, Semi-Conductor, Government, and Hospitality verticals.

Currently, he focuses on Delivery Management, Business Process engagements, Capability Development, Convergence technologies, and Solution Architecture. He is actively building the Mobile Center of Excellence. He had managed the software delivery of engineering teams focusing on various technology platforms including C++, Java EE and Microsoft.Net. He leads internal teams in creating reusable entities, solution frameworks and technical architectures. He mentors the Sales teams in service offerings and campaign management. He had trained engineering teams in **BPMN** and **BPEL**.

He is a Contributing Member of OASIS Business Process Execution Language (**WSBPEL**) Technical Committee and Observer of various other OASIS Technical Committees. He holds a Graduate degree in IT and undergraduate degree in Business Administration. He has been certified on various technologies by leading product vendors and technology platform providers. He constantly drives his focus on technology and stays cutting edge.

While working in Hospitality industry, he managed to create a unique branding position through a consolidated online presence, for a leading Vacation Rental and Resort Real Estate Company. He successfully managed the Systems Integration initiatives in integrating the legacy property management system as well as the next generation property management system of the client. He lead IT Services Management functions, post-production of the initial engagement, working with various information design and software vendors as well as leading business intelligence product vendors and service providers to maximize the revenue generation (from \$500K to \$1.5 M per week), through online marketing initiatives.

With his breadth of technical expertise, he worked as a consultant within various departments of State of Colorado, US. He had played the role of Sr. Software Architect at Colorado Public Health and Environment to help set the technology standards and guidelines to accelerate the value additions from various internal IT teams. He also mentored various teams in their technology projects and managed the development of application blocks as reusable assets.

During his four year consulting tenure with Communications and Content group within Bearing Point (Formerly KPMG Consulting), he provided technology leadership in various business process consulting and technology implementation engagements implementations for major telecommunications carriers and communication product vendors in US. One of his initial engagements had yielded **Smithsonian Award** for KPMG Consulting. He lead a large technical team in an engagement providing an **eTOM** and **ITIL** friendly automation of the entire provisioning processes (Straight Through Provisioning model) for a major US telecommunication carrier. This engagement yielded a significant boost to the business value of their Network Operations Center (NOC).

He had worked for a leading equipment manufacturer to provide Manufacturing Execution Systems as a bundled solution to help their customers produce semi-conductor chips efficiently. During his tenure with them, he had worked with text-based legacy business process engines (like CELLworks) to next generation business process automation products. He led various technology initiatives in evolving their legacy and next generation product platforms to take advantage of the business process technologies.

Professional Memberships and Certifications

Professional Achievements

- Created successful teams on various technology and management areas.
- Established learning model for continuous learning and capability building for the delivery teams.
- Established C++, Business Process, VXML, iPhone solutions practices from scratch.
- Lead the implementation of Theory of Constraints (TOC) model in a large scale project.
- Individually participated in the first BPEL Specification release (WSBPEL 2.0) from OASIS.
- An initial engagement with KPMG Consulting (now BearingPoint) had yielded **Smithsonian Award** for KPMG Consulting.
- Passed 13 Professional Exams with Prometric and got certified by various product and platform vendors during the year 2002.
- Worked on pre-sale roles and created business opportunities within various US State Departments.

Personal Achievements

- Completed the Masters Degree program in the expedited track of ten months.
